

INKJET PRINTERS

"LABELING, CODING AND MARKING SPECIALISTS."

INKJET PRINTERS FOR EVERY CODING REQUIREMENT

CITRONIX CIJ PRINTERS

Citronix continuous inkjet printing systems provide high-speed, reliable, non-contact coding on almost any material including metal, glass, plastic, paper and wood.

All ciSeries models include a user-friendly icon-based operating system and VGA graphical display with full-size QWERTY keyboard for effortless operation.

ciSeries printers are offered in a variety of configurations with several optional components to meet individual application demands for a wide variety of industries including food, beverage, paper, household, bakery, pharmaceutical, automotive, lumber and more.

ci1000

Featuring state-of-the-art, single board electronics technology with an integrated smart printhead and revolutionary ink recovery system, the ci1000 is a top-of-the-line inkjet printing system.

- Compact NEMA 4 (IP65) stainless steel body
- Prints up to five lines of superior text and graphics
- Self regulating ink viscosity control with automated printhead maintenance
- Ethernet communications

ci700

The ci700 inkjet system marries flexibility with affordability. Offered in various configurations, the ci700 was designed for printing in demanding industrial applications requiring immediate dry inks.

- Compact NEMA 12 (IP53) stainless steel body
- Prints up to two lines of superior text and graphics

ci500

The ci500 is an entry level continuous inkjet printing system offering both ease-of-use and reliability.

- Compact NEMA 12 (IP53) stainless steel body
- Prints up to two lines of superior text and graphics
- Simplified fluidics

INKJET

EMENT

EAGLE & RANGER INDUSTRIAL SMALL CHARACTER CODING

The Eagle and Ranger industrial coders offer economically priced inkjet systems delivering the best quality print in the industry for porous and non-porous surfaces.

Eagle® Series

- Prints up to eight lines of text, graphics and barcodes
- Prints at speeds up to 200 feet/minute
- 200 dpi horizontal resolution
- Up to four printheads on one controller
- Windows-based graphical user interface

Ranger® Series

- Prints up to four lines of text, graphics and barcodes
- Prints at speeds up to 125 feet/minute
- Optional Windows-based graphical user interface

SERIES 100 – LARGE CHARACTER PRINTING

For user-friendly, compact solutions to alphanumeric case coding, the Series 100 is the perfect choice.

- Ready to go, right out of the box
- Variable date and time coding formats
- Non-CFC pressurized ink cartridge assures complete ink consumption for long-lasting operation
- User-friendly keypad stores up to 50 messages of 32 characters each

PRINTERS

ID TECHNOLOGY: YOUR EXPERT FOR PRINTING SOLUTIONS

ID Technology has decades of experience in labeling, coding and marking. Our specialists stand ready to help you design a turn-key identification system specifically for your environment and products. No matter how big or small your coding requirements may be, from low-end to high-end, we offer a wide range of inkjet printers to meet every need.

HIGH RESOLUTION LARGE CHARACTER MARKING

PROSERIES PRINTHEADS

The ProSeries printhead is designed for reliable 24/7 operation in today's demanding packaging lines. An anodized aluminum enclosure houses the ink system, printhead and fluids. This innovative design reduces shock and vibration making it one of the most reliable case printing systems available.

- Dual ink feed for improved flow rates and faster print speeds
- APS technology features automatic single-step prime/purge

MARKSMAN PRO CONTROLLER

The Marksman PRO is a modularly designed computerized inkjet controller. The Marksman PRO features touch screen control and a built-in keyboard which runs on the Windows XP platform. And this flexible controller can network up to six ProSeries printheads.

- BoxWriter Pro or BoxWriter Net text editor software
- Compatible with TCP/IP protocols, Windows networks, Novell, 10 Base-T, Ethernet and more
