

e-Cube®

Void Reduction packaging

A fully automated void reduction packaging solution for order fulfillment

The e-Cube® void reduction system automatically creates right-sized packaging for a wide variety of industries. Ideal for companies that ship anywhere from 300 to 3,000 boxes per day.

ELEGANT EFFICIENCY

The e-Cube® reduces or eliminates the need for void-fill, reducing the cost of packaging materials, and creating a more sustainable carbon footprint for any fulfillment operations.

The e-Cube® takes precise measurements of the height of the contents, scores and folds the excess corrugated and seals the flaps automatically creates a perfect fit.

Variable heights, multiple SKUs – the e-Cube® accommodates a wide variety of variables and creates the perfect package for every order.

SUSTAINABLE RESULTS

When packages are right-sized to reduce or eliminate void, the cost of freight is reduced along with the space on the truck, resulting in a more sustainable environmental footprint.

The 100% corrugated package is “curb-side” recyclable and customers around the globe can recycle e-Cube® boxes anywhere, anytime.
